WHAT IS MAMMOGRAPHY?

- ✚ The first line of defense against breast cancer
- ✚ The gold-standard for the detection of early breast cancer
- ✚ The means by which lives can be saved by early detection
- ✚ The single most effective tool in the fight against breast cancer
- ✚ A proven method for early detection that reduces mortality
- ✚ A life-saving exam
- ✚ Our chosen profession

***Rededicate yourself to the field!
Focus on the life-saving benefits!
Save someone's life today!***

WHAT IS RADCOMM, INC.?

RadComm, Inc. was formed by Ms. Jeanette R. Joyce B.A.,R.T.(R)(M) to provide radiographers with quality continuing education of subject matter directly related to their job tasks. Since continuing education is now mandatory, the search for quality has never been so important.

Through the use of computers and the most current medical literature, we can research and document countless subjects of interest to the radiographer. Presently, we are specific to mammography and breast imaging.

RadComm, Inc., can equip you with the knowledge you need to become informed of the latest technology and most current procedures in your profession.

JEANETTE R. JOYCE

Jeanette has a Bachelors in Fine Arts from Mundelein College (Loyola University), Chicago. She received registration in radiology in 1975 and mammography in 1992. She is currently a diagnostic imaging clinician, specializing in mammography, a health educator, and a breast cancer survivor. Her previous experience includes curriculum design, didactic instruction, and clinical instruction in the School of Radiologic Technology at Ravenswood Hospital Medical Center in Chicago. Jeanette is a former facilitator for the American Cancer Society's Special Touch program for breast health. She is a member of the following professional organizations: ARRT (American Registry of Radiologic Technologists), ASRT (American Society of Radiologic Technologists).

WHO USES RADCOMM?

Busy radiographers just like you! Actively pursuing a career in allied health; working various shifts; devoting more time to overtime hours; pressed by staff shortages; feeling the financial constraints of the managed-care environment; juggling home and professional responsibilities; having little time for seminars. AND, you are also required to obtain credits for continuing education, often with little or no reimbursement from your employer. At RadComm, Inc., we understand your situation and would like to offer you a choice at a competitive price.

As of October, 1997, the FDA requires evidence of an average of 5 CE credits per year specific to mammography. (15 credits in 3 years - MQSA).

YOUR ADVANTAGE:

You can receive quality continuing education credits when you need them at an affordable price. These study units can be read in your own home or taken to your workplace. You no longer have to travel to seminars to complete your continuing education requirements.

In a hurry? Read the study units, complete the tests, and FAX the tests back to us. Your certificate of successful completion will be returned to you promptly. It's that easy!

All of our courses are backed with a 14 day money-back guarantee if you are not satisfied for any reason. Just return the materials and you will receive a full refund excluding S&H.

HOW IT WORKS:

Simply read the study units at your own convenience. Complete the self-assessment test and return it to RadComm, Inc. You will receive a certificate of successful completion which you can copy and submit for continuing education credit. ASRT members and ECE participants can submit this certificate to the ASRT so credit can be entered into ECE tracking.

RadComm, Inc. can equip you with the knowledge you need to become informed of the latest technology and the most current procedures in your profession.

There are no membership fees or hidden costs. Choose only the courses which interest you. Willing to share study booklets with your co-workers? Inquire about our special savings on volume discounts.

Rest assured, all courses offered by RadComm, Inc. have been approved by the American Society of Radiologic Technologists (ASRT).

Individual state approval from: Iowa (IA), Illinois (IL), Florida (FL), and California (CA).

RadComm, Inc., a leader in mammography self-studies, now offers a series of PowerPoint lectures for your seminar needs at your location. Call Jeanette for availability, fee schedule and scheduling.
